

Contrast- The difference between light and dark.

High Contrast– Where the difference between black and white approaches its maximum.

Divide the image into 3 sections.

1. Foreground
2. Middle
3. Background

Background

Middle

Foreground

Depth is created by applying different values of the grayscale to each section

1. **Foreground** will be **Black**
2. **Middle** will be between **80% and 60%** grayscale value
3. **Background** will be between 40% and 10% grayscale
